Personal Statement

Software engineer with around three years of experience building web and mobile products, currently leading a cross-platform mobile team shipping React Native (Expo) apps to Google Play and the App Store. Hands-on production experience with React Native, Next.js, TypeScript, NestJS, and PostgreSQL, along with AWS infrastructure (EC2, RDS, S3, ALB, IAM) managed with Terraform and release automation through EAS CI/CD. Experienced in integrating identity verification services, including Singpass (MyInfo API) and Tencent Cloud eKYC, and supported by a portfolio of full-stack and AI-integrated projects.

Working Experience

Full-Stack Developer, Studio20, Kuala Lumpur

December 2025 - Present

- Lead the mobile development team building cross-platform Android and iOS applications with React Native and Expo.
- Built a CI/CD pipeline on EAS (Expo Application Services) that automates builds and submission to the Google Play Store and Apple App Store.
- Integrated third-party identity services, including Singpass (MyInfo API) for government-verified user data and Tencent Cloud eKYC for identity verification.
- Manage production infrastructure on AWS (EC2, RDS, S3, ALB, IAM), provisioned and maintained with Terraform.
- Develop backend services with NestJS and PostgreSQL, including scheduled cron jobs, and maintain containerized environments for repeatable deployments.

Junior Software Developer, Siaga Labs Sdn Bhd, Subang Jaya, Selangor

November 2024 - December 2025

- Built and maintained modern web applications using Next.js and TypeScript.
- Connected back-end and front-end systems through RESTful APIs using Axios.
- Tested and documented APIs with Swagger and Postman to ensure correct behaviour and smooth deployments.

Software Engineer (Protege), Mesiniaga Berhad, Subang Jaya, Selangor

February 2024 - October 2024

- Developed front-end web applications using TypeScript on the Angular framework.
- Implemented REST API integration, connecting business logic to the Angular front-end.
- Resolved partner-raised tickets and bugs related to the internal library and company framework in GitLab.
- Verified API deployment status using Swagger and Postman.

Software Engineer Intern, Netizen Experience, Kuala Lumpur

March 2023 - August 2023

- Contributed to web development using React and TypeScript.
- Produced e-commerce technical documentation involving Next.js and AWS Lambda.

Projects

AI-Powered Notes with RAG

github.com/ainmutaqorrobin/AI-notes / ai-notes-vert.vercel.app

- Intelligent note-taking application that lets users create notes and ask questions about them using Retrieval-Augmented Generation (RAG) with OpenAI.
- Tech: Next.js, Convex, OpenAI, Radix UI, Tailwind CSS, TypeScript, Docker.

Book Review Platform

github.com/ainmutaqorrobin/book-review-platform / book-review.mutaqorrobin.online

- Full-stack platform where users browse books and write reviews, with each review automatically enriched by AI (summary, sentiment analysis, and relevant tags) via Mastra AI.
- Tech: Next.js, Express, TypeScript, PostgreSQL, Mastra AI, ShadCN, Docker.

Ticketing Application (Microservices)

github.com/ainmutaqorrobin/TicketingApp

- Microservices-based ticketing system inspired by real-world event-ticketing platforms, demonstrating event-driven architecture, asynchronous communication, and service isolation.
- Tech: Node.js, Express, MongoDB, NATS Streaming, Docker, Kubernetes, Skaffold.

Skills and Technologies

Frontend: JavaScript, TypeScript, React, Next.js, Angular, Redux, Zustand, Tailwind CSS, Radix UI.

Mobile: React Native, Expo, EAS Build, EAS Submit, Android, iOS.

Backend: Node.js, Express.js, NestJS, scheduled jobs (cron).

Databases: PostgreSQL, MongoDB, Microsoft SQL Server, SQLite, Firebase, Convex, Redis.

DevOps and Cloud: AWS (EC2, RDS, S3, ALB, IAM), Terraform, Docker, Kubernetes, Ansible, EAS CI/CD, GitHub Actions, Prometheus, Grafana.

Architecture: Microservices, Event-Driven Architecture, Micro Frontends, Monorepo (Nx, Turbo).

APIs and Tools: REST, Singpass (MyInfo API), Tencent Cloud eKYC, Postman, Axios, Swagger, NATS Streaming, BullMQ, Cloudinary.

AI: OpenAI API, Vercel AI SDK, Mastra AI, Retrieval-Augmented Generation (RAG).

Testing and Version Control: Jest, Git, GitHub, GitLab, VS Code.

Education

Bachelor of Computer Science (Software Engineering), Universiti Malaysia Pahang (UMP), Pekan, Pahang

2019 - 2023

- CGPA 3.35, with Dean's List recognition twice (GPA 3.5 and above).

Kolej Matrikulasi Pahang (KMPH), Gambang, Pahang

2018 - 2019

- CGPA 3.58, with Dean's List in Semester 2 (GPA 3.92) and a Co-curricular Semester Figure Award.
